

# Shell. 92 years in Brazil

A renewed energy to move generations.

In the 92 years in Brazil, Shell has done all it could to use its energy for the growth of the country. Shell developed new products and services, invested in new businesses, supported social and environmental projects and encouraged the country's culture. And in all these actions Shell has followed strict ethical principles, always with a growing concern with the community and the environment.

It has been 92 years of accomplishments in Brazil. But for Shell, this is only the beginning of a long path.
